- Education
- Healthcare
- Corporate.
- Transportation
- Banking & Finance
- Manufacturing & Industrial
- Public Sector & Government

PORTFOLIO

PIPView+ Desktop Control

The PIPView+ desktop controller puts effortless touch control at your fingertips, giving you real-time visibility of every input on the main display. No more guesswork, see exactly what's connected and live. Instantly move, resize, or arrange multiple inputs from full-screen to dynamic picture-in-picture layouts.

The Rack Controller

At the core of PIPView+ is a powerful engine capable of ingesting any video format, scaling it, and processing it in real time to deliver the highest quality with ultra-low latency. It supports layered inputs for a seamless, dynamic display. The versatile canvas can be configured from a single screen to expansive multi-display setups, like a 4x3 grid, for truly captivating audience engagement.
