

SDI*x*TM

MAXIMUM IMPACT SUPREME QUALITY

Enjoy uncompromising playback quality across every display size and shape, delivering flawless visuals, seamless performance, and consistent clarity, no matter how bold, complex, or unconventional your setup.

Supreme Quality

Designed to deliver uncompressed video in the highest possible formats, far beyond HD or 4K, **SDI*x*** solution ensures flawless playback with stunning smoothness and uncompromising visual fidelity, regardless of the display's size, shape, or complexity. Every frame captivates with precision and brilliance.

Simplicity for everyone

Operating the **SDI*x*** is simplicity itself. Its intuitive web interface allows users to drag and drop media, create and manage playlists, and schedule playback, no specialist training or technical expertise required.

Flexible Workflow

SDI*x* supports flexible media handling, allowing seamless integration of diverse formats including images, multi-page PDFs, MP4 videos, and uncompressed video.

This versatility ensures smooth playback and workflow management across a wide range of display applications, from simple signage to complex installations.

Perfect For

- Corporate Receptions
- Premium Signage
- Unusual Display Shapes

SCENARIOS

Investing in uncompromising display technology demands playback systems engineered to the same exacting standards, because a display is only as powerful as the content and hardware driving it.

- Corporate reception
- Advertising billboard
- Internal premium signage
- Artistic displays

PORTFOLIO

WEB Control

The web-based control interface is designed for intuitive, non-technical use. It features clear iconography, drag-and-drop media uploads, streamlined playlist creation and scheduling, and a real-time status page for remote output monitoring. An advanced mode supports multi-user access with role-based permissions, enabling functions such as remote support and media authorization for playlist management.

The Rack Player

The player is engineered with cutting-edge, high-performance graphics processors, expansive onboard storage capacity, and ultra-fast media transfer capabilities. It also offers options for dual redundant power supplies, high-speed network connectivity, and other precision-engineered components specifically selected to ensure continuous, uninterrupted 24/7 operation in demanding environments.
